

AGRAVIT E-SELENIUM - injectable solution

Description:

Vitamin E is a fat-soluble intracellular antioxidant preventing formation of toxic free radicals. These free radicals can be formed in periods of disease and stress. Selenium is an essential nutrient and plays an important role in the protection of cells by destroying oxidising agents like free radicals and oxidated unsaturated fatty acids.

Composition:

Each ml contains:

Vitamin E: 50 mg

Sodium Selenite: 0,5 mg

Indications:

Vitamin E-Selenium is indicated in the prevention and treatment of vitamin deficiencies in animals, e.g. encephalomalacia, muscular dystrophy, decreased hatchability in eggs, infertility problems in calves, goats, poultry, sheep and swine. Also prevention of iron- intoxication after administration of iron to piglets.

Dosage and Administration:

For intramuscular or subcutaneous injection.

Calves, goats, sheep: 2 ml per 10 kg bodyweight repeated after 2-3 weeks.

Swine: 1 ml per 10 kg bodyweight repeated after 2-3 weeks.

Storage: Keep closed in a cool and dry place, away from sunlight and safe from children.

Packing:

4 x 12 x 100 ml in 1 carton.

FOR VETERINARY USE ONLY
